

# The Future Treatment of Tinnitus

27-29 July 2006

Regensburg, Salzstadel

## First Tinnitus Research Initiative Meeting

*Dear Friends and Colleagues,*

*It is with sincere pleasure that we invite you to participate in the First Tinnitus Research Initiative Meeting in Regensburg, which will take place from July 27th to July 29th 2006.*

*Constituting the first scientific meeting of the Tinnitus Research Initiative this event has been organized to present the funded Tinnitus Research Projects of the current Grant Program.*

*This meeting will communicate recent scientific and clinical information, but also facilitate knowledge transfer and encourage collaboration between participating institutions.*

*Taking place in Regensburg, Germany, one year after the idea of the Tinnitus Research Initiative was born, we are proud to welcome researchers from all over the world joining our rapidly growing interdisciplinary scientific network.*

*We wish that you will enjoy intense scientific discussions but also the city of Regensburg, its unique medieval atmosphere, the Bavarian hospitality....*

Göran Hajak

Matteo de Nora

Tobias Kleinjung

Berthold Langguth

### **Topics**

Pathophysiology of chronic tinnitus

Assessment of tinnitus and treatment effects

Somatic tinnitus

Functional imaging of tinnitus

Tinnitus and whiplash injury

Treatment of tinnitus with central acting drugs

Genetics of tinnitus

Auditory stimulation for the treatment of tinnitus

Animal models of tinnitus

Tinnitus and brain stimulation

Regensburg invites you to experience history, tradition and charm. Two thousand years have remained alive here, and to fall in love with this town you don't need textbooks. Just stroll through the narrow streets and alleys, and you can get a feeling for life in the days of old. The remarkable buildings and towers offer an unspoiled look into the past.

Regensburg is often referred to as the most Italian city north of the Alps, thanks to grandiose patrician houses whose Italian-style towers reach to the heavens and embellish the city skyline. The **Salzstadel as congress venue** is located close by the Stone Bridge. This impressive building tells about the salt trade of past times.

All this is further enhanced by the city's magnificent location, situated at the northernmost point of the Danube in the midst of gently rolling hills. It can be reached easily from the International Airport Munich within one hour.

### Participation and Registration

All investigators funded by Tinnitus Research Initiative are invited to participate and present their research programs.

Furthermore, it is possible to present poster contributions. Please submit your abstract by e-mail to [Ulrike.Soltani@medbo.de](mailto:Ulrike.Soltani@medbo.de) until 15 June 2006.

Registration fee: 250 Euro (including welcome reception and gala dinner)

There is a limited number of travel awards. Please contact us directly by e-mail attaching your CV and application letter: [Ulrike.Soltani@medbo.de](mailto:Ulrike.Soltani@medbo.de)

More detailed information about travel and accommodation will be included in the preliminary program (to be sent out mid of May 2006 - please take also a look at our website [www.tinnitusresearch.org](http://www.tinnitusresearch.org))  
The Regensburg tourist office can be contacted via <http://www.regensburg.de>

The language of the meeting is English.

**Preliminary Program Delivery** 15 May 2006

**Registration Deadline** 15 June 2006
