

	A	B	C	D	E
<b>Workshop session I</b>	Models for the interaction between somatosensory and auditory systems  Animal models <b>Susan Shore</b>  Deafferentiation induced plasticity: <b>Anthony Cacace</b>	Cluster analysis of clinical characteristics  <b>Richard Tyler</b>	Salicylate modulates arachidonic acid-sensitive NMDA receptors at the sensory inner hair cell synapse <b>Jean-Luc Puel</b>	Induction of brain plasticity by auditory perceptual training  <b>Grant Searchfield</b>	Challenging our basic assumptions  <b>Andrew Parr</b>
<b>Workshop session II</b>	Diagnostic approaches for somatosensory tinnitus  <b>Robert Levine</b>  <b>Michael Golenhofen</b>	Psychoacoustic and Electromagnetic Properties of Residual Inhibition and Tinnitus <b>Larry Roberts</b>	What do we need for the development of a tinnitus-drug?  <b>Ana Belen Elgoyhen</b>	Tinnitus and virtual reality therapy  <b>Isabel Viaud-Delmon</b>	Mechanisms of auditory cortex stimulation  <b>Jinsheng Zhang</b>
<b>Workshop session III</b>	Clinical experiences Somatosensory modulation  <b>Tanit Ganz Sanchez</b>  Evaluating the interesting triangle: tinnitus, cervical spine and temporo-mandibular disorders. <b>Eberhard Biesinger</b>	The role of non-auditory brain areas  <b>Joseph Rauschecker</b>	Which Neurotransmitter systems should be addressed? <b>Aage Møller</b>	Hearing devices: state of the art and future expectations <b>Luca Del Bo</b>	TMS and Tinnitus  <b>Berthold Langguth</b>
<b>Workshop session IV</b>	Therapies for somatosensory tinnitus Drugs: <b>Carlos Herraiz</b>  Trigger-point based treatment: <b>Marjia Estola-Partanen</b>	fMRI and tinnitus  <b>Jennifer Melcher</b>  Increased neural response to auditory stimulation in tinnitus patients <b>Pim van Dijk</b>	Animal models of tinnitus: current state and future perspectives <b>Edward Lobarinas</b>  Monitoring of activity dependent genes in animal models of tinnitus <b>Marlies Knipper</b>	Cochlear electrical stimulation for the treatment of tinnitus <b>Bruno Frachet</b>	A comprehensive brain model of tinnitus  <b>Dirk De Ridder</b>
<b>Workshop session V</b>	Metabolic and nutritional factors in tinnitus: concepts and facts <b>Manuela Mazzoli</b> Oral neurotransmitters and Kenogenic diet <b>Miguel Lopez Gonzales</b>	Oscillatory activity as neural code of tinnitus  <b>Nathan Weisz</b>	Drugs brainstorming: which drugs should be tested?  <b>Miguel Lainez</b>	Computational models of Tinnitus: implications for therapy <b>Lucas Parra</b>  <b>Roland Schaette</b>
